# Fixing Robotic or Distorted Sound In Mumble

Here are a few fixes that can help cure the "robot voice" or distortion problems Mumble can have.
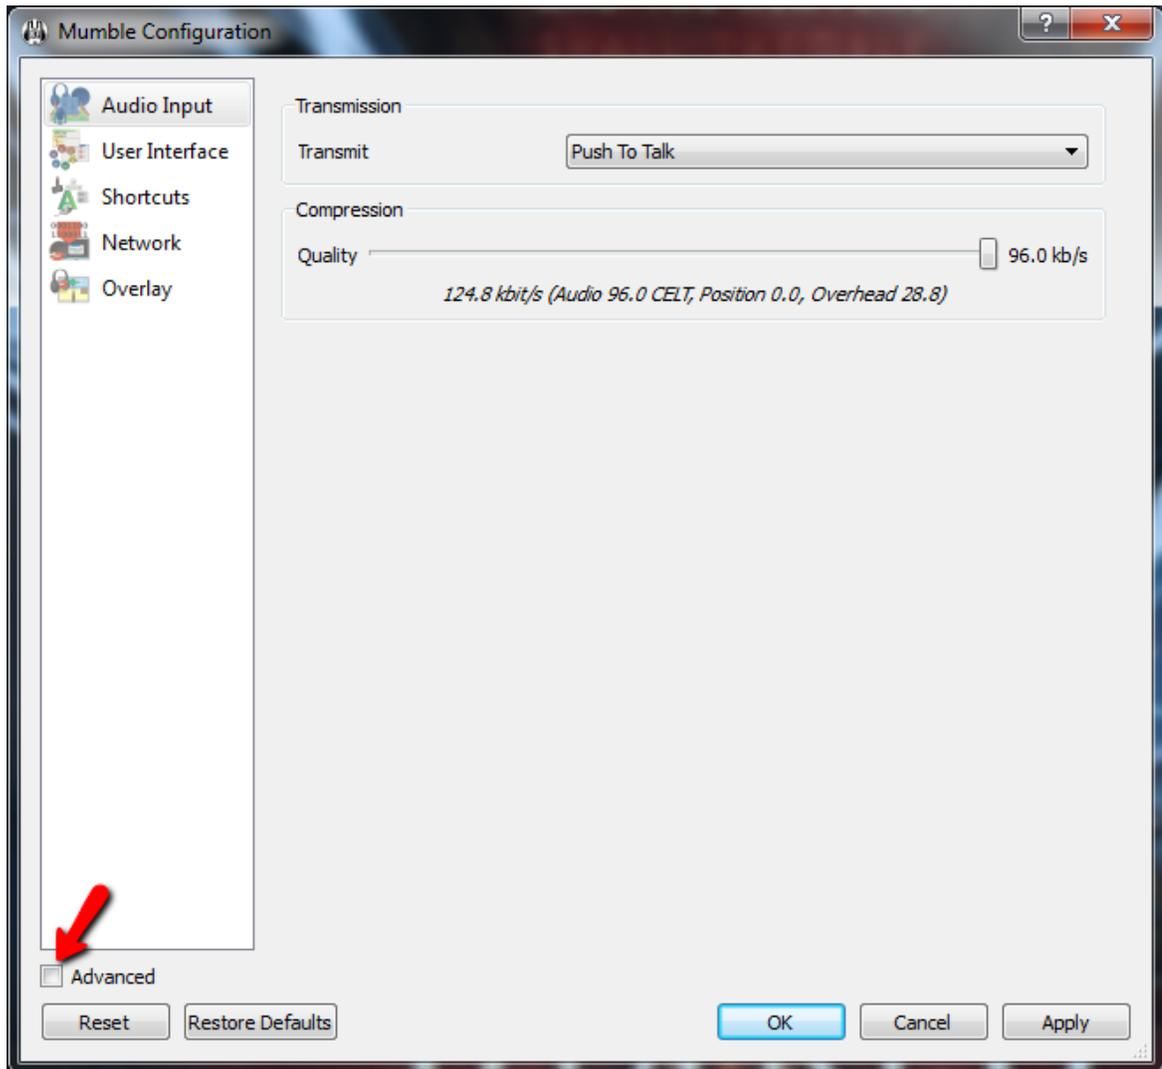

1. Open Mumble
2. Open the Mumble Configuration Menu
   At the top of the Mumble program click the "Configure" option then click "Settings".

3. Set Advanced Mode

   At the bottom left of the program select the "Advanced" option.

4. Change the Compression Settings

   Try lowering the codec quality down a few selections, as well as increasing the audio per packet setting up a few selections.

5. Increase the "Jitter Buffer"
    Try increasing the Jitter Buffer up a few selections and see if this
    helps any.
